
Digital Barometers

PRESSURE

AP 00257

PRODUCT

136 PC

APPLICATION

Home, TV, and radio station digital barometers are manufactured using the MICRO SWITCH 136 PC absolute pressure sensors. The sensors are sealed with a vacuum reference, allowing atmospheric measurements. Barometric changes in the 28 to 32 inches of mercury range (approximately 14 to 16 psia) are sensed. the output triggers a digital display for easy reading.
