

A Crown Block	Measure weight on drill line via cable tension Load cells: 41, RM
B Power Generation Unit	Measure oil, water, and hydraulic fluid pressure Pressure sensors: FP2000, MLH, IP, PX2, SPT Emergency shutdown Switches for ESD: WOI
D Accumulator Unit	Measure inlet/outlet pressure with high accuracy Pressure sensors: FP2000, STJE
E Drilling Cab	Control/monitor operations activity MICRO SWITCH™ basic switches: BZ, V7, V15W, SX MICRO SWITCH™ toggle switches: TL, NT, TS, TW, ET, AT Key, rotary, and e-stop switches: custom Limitless™ operator interface: WOI
F Rig Hydraulic Lift	Measure hydraulic pressure, weight, force/strain or movement, monitor raising or lowering deck for directional drilling Pressure sensors: FP2000, IP Load cells: 41
H Drawworks	Measure torque, load/weight/position while guiding pipe into position Load cells: 41, RM MICRO SWITCH™ switches: BX, LSX
I Iron Roughneck	Measure torque while attaching pipe using hydraulic pressure or load measurements Load cells: 41 Pressure sensors: FP2000, IP
M Water/Storage Tank	Measure tank liquid levels Switches: HDLS, WLS non-contact Pressure sensors: MLH, LL-V, SPT, PX2
N Top Drive	Monitor torque/twisting movement to ensure right amount of force is applied Torque sensors: custom Measure weight on drill bit Load cells: 41 Measure hydraulic pressure and feed information into control system Pressure sensors: FP2000, 811FM On/off control and operator alerts to enhance safety Limitless™ operator interface: WOI
O Traveling Block	Measure weight on the drill line via cable tension Load cells: 41
R Deadline Anchor	Measure tension on deadline/drilling line cable Load cells: 41, RM
T Choke Manifold	Measure valve position/choke valves MICRO SWITCH™ hazardous area switch: CX
U Mud Return Line	Measure drilling mud pressure to monitor and control mud flow Wing Union sensors: 424, 425, 427
V Mud Shaker	Position sensing or on/off applications Switches: HDLS, WLS, WOI
W Mud Cleaner	Position sensing or on/off applications Limit switches: HDLS, WLS, WOI
Y Mud Pump	Measure pressure and flow of mud media Wing Union sensors: 424, 425, 427 On/off or emergency start/stop applications Limitless™ operator interface: WOI Mud pump stroke count, position sensing, or on/off applications MICRO SWITCH™ limits: EX, BX, HDLS

Z Winch	Measure direct and indirect loads Canister load cells: MPB, 3130, 3156, 3127
AB BlowOut Preventor	Monitor RAM position via hydraulic volumetric or pressure behind the piston ("pinch offs") Pressure sensors: A-105, TJE
AD Drill Bit	Measure pressure or differential pressure at high temperature and pressure ranges Pressure sensors: S

AE Fluid Manifold	Measure drilling fluid pressure Pressure sensors: FP2000 Wing Union sensors: 424, 425, 427 Measure valve position Limit switches: CX, WLS
AF Mud Tank/Reservoir	Measure tank liquid levels Pressure sensors: FP2000, IP, SPT Monitor tank valve position Limit switches: BX, LSX, HDLS, WLS

Sensors and Switches in Oil Rig Applications

Pressure Sensors

FP2000 Series

- All-welded, stainless steel construction
- Gage, absolute, barometric, vacuum, differential pressure
- Range: 0.5 psi to 10,000 psi
- Accuracy range of 0.1 % or 0.25 %
- Intrinsically safe options available

MLH Series

- All metal wetted parts for use in wide variety of fluid applications
- No internal elastomeric seals mean no o-ring compatibility issues
- Range: 50 psi to 8000 psi (inclusive)
- Accuracy: ± 0.25 %FS BFSL
- Rated IP65 or better for protection from harsh environments

IP Series

- Rugged, all-welded stainless steel and Hastelloy® wetted parts for durability
- Compatible with a wide variety of media (i.e. chemicals or gases)
- Range: 5 psi to 10,000 psi; 0.5 bar to 700 bar
- Accuracy: ± 0.15 %, ± 0.25 % BFSL
- Total Error Band incl: non-linearity, repeatability, hysteresis, temperature error

PX2 Series

- Cost effective, highly configurable and highly durable
- Compatible with a wide variety of harsh media
- Broad compensated temperature range with industry-leading Total Error Band
- Range: 100 psi to 667 psi [7 bar to 45 bar]
- Accuracy ± 0.25 %FSS; TEB 2 %

SPT Series

- Rugged, stainless steel in a small size package
- Absolute, gage, sealed gage, vacuum gage
- Range: 0 psi to 3 psi, 0 psi to 5000 psi; ± 0.25 % accuracy
- Reliable semiconductor technology, NEMA 4 design
- Calibrated and temperature compensated

Model TJE

- Rugged, all-welded, stainless steel construction
- Built for applications requiring high accuracy and temperature stability
- Unique "true gage" design hermetically sealed against atmospheric contamination
- Range: 1 psig/a to 60000 psig/a; Accuracy: ± 0.10 %
- Intrinsically safe available

Super TJE Series

- Ultra precision pressure sensors with up to ± 0.05 % accuracy
- True gage, absolute and differential (wet/wet)
- Durable, stainless steel for use in rugged environments
- Range: 10 psig to 7500 psig (pressure); 50 psid to 750 psid (differential)
- Intrinsically safe options available

811FM Series

- All-welded, stainless steel construction for use with liquid, gas or corrosive vapors
- Range: 2 psig/a to 10000 psig/a
- Accuracy: ± 0.25 %
- Dual pipe thread pressure fitting for easy bulkhead mounting
- Explosion proof

Model S

- Rugged, high-frequency stainless steel
- Extremely small size, fits into tight spaces
- Range: 100 psig to 15,000 psig
- Operating temperature range: -54 °C to 149 °C [-65 °F to 300 °F]
- Accuracy: ± 1.0 %

Model A-105

- Rugged, unitized stainless steel design with heavy sidewalls
- Thin diaphragm design able to measure low pressures
- Flush mount design with miniature footprint
- Can be used in corrosive fluid environments
- Range: 100 psig to 15,000 psig; Accuracy: ± 0.5 %

LL-V Series

- Designed for vertical entry into a tank
- Complete fluid submersion; corrosion resistant to most fluids
- True gage design with all welded stainless steel construction
- Range: 20 inH₂O to 50 psig; Accuracy: ± 0.1 %

Wing Union Pressure Sensors (Models 424, 425, 427)

- Rugged design with Inconel® X-750 wetted parts
- Built to provide durability with abrasive or corrosive media
- Choose ± 0.2 % BFSL accuracy or ± 0.1 % BFSL high accuracy (Model 425)
- Wide port aperture (Model 427) for use with more viscous media
- Intrinsically safe option available

Torque Shafts

Custom Torque Shaft

- Modify/design existing top drive shafts to measure torque
- Strain-gauge the complex large shafts found in top drives
- Calibrating to torque levels required on a top drive
- Modify/adapt the calibration rig flanges to the custom flanges on a top drive shaft

Operator Controls

Rotary Switches

- 3- and 4-position options
- May be engineered with lever or knob actuator
- Integral connectors (Metripak 280 and Sumitomo)
- Environmentally sealed design

e-Stop Switches

- Provides positive contact closure and opening when the switch is operated
- Environmentally sealed design (IP67 sealing)
- UV-resistant knob for outdoor use
- Knob available in a variety of colors

MICRO SWITCH™ Toggle Switches (Sealed and Unsealed)

- Broad product range meets a variety of electrical and load requirements
- Sealed models built to withstand harsh, wet, dusty, and dirty environments
- 2 or 3 position, momentary and/or maintained action; 1-, 2- or 4-pole circuitries
- IWTS (integrated wire termination system) for ease of assembly and maintainability

Load Cells

Model 41

- Rugged, low profile pancake style load cell
- All-welded stainless steel with double diaphragm design
- Load ranges of 5 lb to 500,000 lb; Accuracy: ± 0.1 %
- Low sensitivity to extraneous loads
- Intrinsically safe option available

Model RM

- Rod end in-line tension load cell
- Rugged design with stainless steel, all-welded construction
- Load ranges from 2000 lb to 200,000 lbs; ± 0.22 % to 0.29 % accuracy
- Low sensitivity to extraneous loads

Model MPB

- High capacity load measurements in a small size load cell
- Rugged stainless steel construction
- Load ranges from 15,000 lbs to 2,000,000 lbs
- Accuracy: ± 0.25 % full scale

Model 3130

- Carbon steel, fatigue-resistant load cell
- Extremely resistant to extraneous bending and side loading forces
- Load ranges of 500,000 lbs to 1,000,000 lbs
- Accuracy: ± 0.30 % full scale

Model 3156

- Carbon steel, fatigue-resistant load cell
- Extremely resistant to extraneous bending and side loading forces
- Load ranges of 25,000 lbs to 150,000 lbs
- Accuracy: ± 0.30 % full scale

Model 3127

- Carbon steel, fatigue-resistant load cell
- Extremely resistant to extraneous bending and side loading forces
- Load ranges up to 2,000,000 lbs.
- Accuracy: ± 0.30 % full scale

MICRO SWITCH™ Basic Switches

MICRO SWITCH™ Premium Large Basic Switches

- Accepted as the world-wide standard snap-action switch
- Best suited for high cost-of-failure applications
- Designed for 100k operations at full load or 10M for mechanical life
- Current ratings from 10 A to 25 A
- UL/CSA, CE, ENEC approvals

MICRO SWITCH™ Premium V-Basic Switches

- Best suited for higher cost-of-failure applications
- Designed for 100k operations at full load or 10M for mechanical life
- Current ratings from 0.1 A to 25 A
- UL/CSA, ENEC approvals

MICRO SWITCH™ Premium Miniature/Subminiature Basic Switches

- Best suited for higher cost-of-failure applications
- Small size and light weight
- Current ratings from 0.1 A to 25 A
- UL/CSA, ENEC approvals

MICRO SWITCH™ V15W Series Watertight Miniature Switches

- Miniature-sized basic switch designed for harsh-duty, wash down areas
- Rugged, highly accurate machine control for turning circuits on and off
- Compact, lightweight, and long-lasting
- UL, cUL, ENEC, CQC approvals

MICRO SWITCH™ Limit Switches

MICRO SWITCH™ BX and LSX Series Hazardous Area Switches

- Designed specifically for dangerous indoor or outdoor locations
- Superior reliability and repeatability
- Explosion-proof design with flame path to contain and cool escaping hot gases
- O-ring seals render switches weather-proof, water-tight, dust-tight
- UL, CSA (BX, LSX Series); ATEX, IEC EX, NEPSI, European approvals (BX Series)

MICRO SWITCH™ CX Series Hazardous Area Switches

- Hazardous atmosphere outdoor use – watertight, dust-tight
- Superior reliability and repeatability
- Rotary converts in seconds to clockwise, counter-clockwise, or both-way operation
- IP66; NEMA 1, 3, 4, 4X, 6, 6P, 13 sealing
- UL, CSA, ATEX, IEC Ex approvals

MICRO SWITCH™ EX Series Hazardous Area Switches

- Designed specifically for dangerous indoor or outdoor locations
- Superior reliability and repeatability
- Smallest UL-listed housings available for use in hazardous locations
- O-ring seals render switches weather-proof, water-tight, dust-tight
- UL, CSA, ATEX, IEC EX approvals

MICRO SWITCH™ HDLS Heavy-Duty Limit Switches

- Three series offer rugged, die-cast body and epoxy coating
- Boss-and-socket head design for secure head-to body retention
- Multiple mounting and actuator options
- UL, CSA, CE, CCC approvals

Limitless™ Wireless Solutions

Limitless™ WOI Series Wireless Operator Interface

- Enables operator indication from locations where wiring is too costly or not possible
- Flexible operator type options (push button, rotary or key switch, etc.)
- Reduced installation/maintenance costs with no wires, conduit, connectors, etc.
- Eliminates issues with wire connection integrity on moving equipment

Limitless™ Wireless Non-Contact Switches - WLS Series

- MICRO SWITCH™ HDLS heritage combined with the latest wireless technology
- Enables presence/absence detection where wiring is an issue or not feasible
- Reduced installation/maintenance costs due to no wires, conduit, connectors, etc.
- Eliminates wire connection integrity issues on moving equipment
