

Efficiency Meets Reliability: Highly flexible power and control cable

The KAWEFLEX® 6110 & 6210 cables are designed for highly dynamic applications, offering exceptional flexibility with up to 5 million bending cycles. These power and control cables are built to withstand exposure to grease, coolant fluids, lubricants, and are oil-resistant. Rated for 600 V, they ensure reliable performance even in challenging industrial environments. The flame-retardant (FT1) design enhances safety, while the KAWEFLEX 6210 is optimized for EMC-compatible applications, making it ideal for sensitive electronic equipment.

Ultimate Flexibility and Durability

Superior Control Cables for Dynamic Applications – KAWEFLEX® 6110 & 6210

Industry Segments:

- Industrial Automation
- Machine Tools
- Automotive Industry
- Renewable Energy
- Food and Beverage Industry
- Logistics and Material Handling
- Packaging Industry

Products:

KAWEFLEX® 6110 SK-PVC UL/CSA & 6210 SK-C-PVC UL/CSA

- Highly flexible power and control cable
- Up to 5 million bending cycles
- Largely resistant to grease, coolant fluids and lubricants
- Oil resistant
- Voltage Rating: 600 V
- Flame-retardant according to FT1
- 6210: recommended for EMC-compatible applications
