

Space Tight?

GO FLAT!

Flat cables occupy just 50% the space of comparable round cables. For dense packaging, flat cables are the most space-efficient solution. Cicoil Flat Cable, with its thin profile and extreme flexibility is the ideal choice where space is tight.

- ▶ **One Cable For Everything:** Combine Power, Signal, and Tubing into a single flat cable for the smallest packaging density.
- ▶ **Standard or Custom:** A wide variety of standard cables are available, and our engineers can design custom cables for any requirement or industry.
- ▶ **Design Your Own:** Our Online Configurator lets you design virtually any flat cable in minutes! You get an immediate drawing, and your custom cable is delivered in less than 2 weeks.
