

MFS

Sub-miniature Switches

RoHS Compliant

Common Specifications

Initial contact resistance

Measured at 1.5 mA 200 μ VAC 1kHz

Dielectric strength

Measurement at 500 VAC.

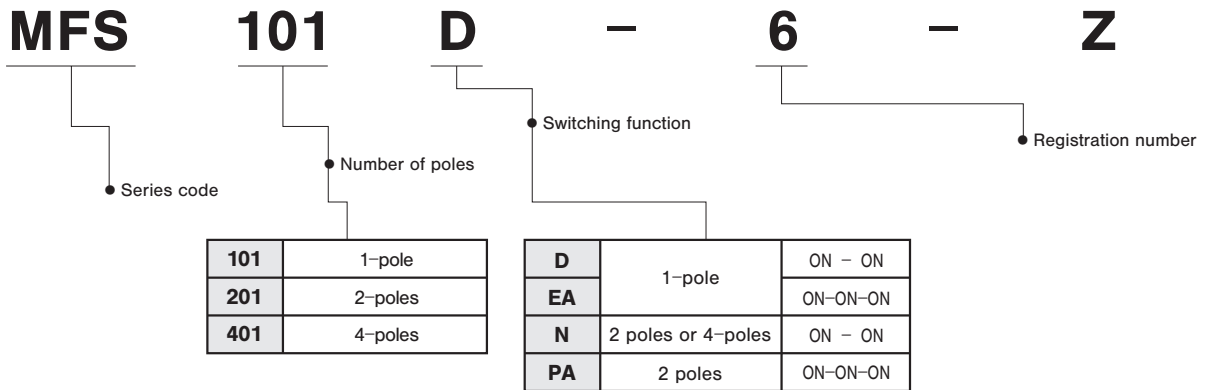

Insulation Resistance

Measured at 500 VDC

Operating temperature range

-10°C ~ +70°C

Part Numbering

Note: Some model names may not be registered. Please refer to the listed products in this series.

MFS101D-6-Z

Non-shorting

Specifications

Rating	Max.	DC10V 0.3A (Resistive load)
	Min.	DC5V 10mA (Resistive load)
Initial contact resistance	20m Ω Max.	
Dielectric strength	AC500V 1 minute	
Insulation resistance	100M Ω Min.	
Electrical life	5,000 cycles	
Operating force	0.98~2.94N	
Switch timing	Non-shorting	

Switching function (/Viewed from A)	Circuit diagram	No. of terminals
ON		3
2-3		

Terminal numbers are not shown on the switch.

MFS101D-14-Z

■ Soldering

(1) Manual Soldering

Device : Soldering iron

Please refer to "MFS Series Heat-resistant Table" shown below.

(2) Auto Soldering

MFS series are not compatible with auto soldering. Soldering should be done manually.

(3) When soldering two or more terminals to the common land, use solder resist to solder them independently.

■ Flux Cleaning

(1) Solvent : Fluorine or Alcohol type.

(2) MFS Series are not process sealed. If the PC board is to be cleaned, clean the soldering surface of substrate with a brush so that the switch is not exposed to the cleaning solution.

■ Frequency of switch use

If the switch is not likely to be operated frequently (e.g. two or three operations a year) in the dry circuit area, a sulfide film is likely to be formed on the contacts, resulting in contact failure. If this is the case, gold-plated products are recommended. Please contact your local Nidec Components sales representative.
