Value-added Service

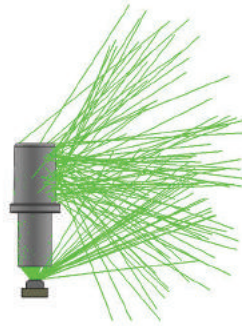

VCC's value-added services team can modify our standard illuminated components or design a fully custom solution in accordance with our customers' mechanical, electrical, and optical needs.

For customizations big or small, we possess comprehensive expertise in design, prototyping, tooling, manufacturing, and assembly.

- Custom panel mount indicators / light pipes
- Light Modeling design services
- Customized cable harnesses
- Mechanical, electrical and optical changes
- Conformance regulatory requirements (UL, CE)
- NEMA and IP Rating performance
