***The CNX 722 Series indicators feature three connection options that facilitate fast, easy installation in outdoor applications...***

**Rugged Panel-mount Indicators Provide Bright Indication  
In Electric Vehicle Charging Stations**

POWAY, CA (September 25, 2014) — VCC, the global leader in indication and specialty illumination solutions, has developed a series of IP67 and NEMA 6P rated panel-mount indicators designed with a wide viewable angle that delivers bright visibility even in direct sunlight. Utilized in outdoor applications including electric vehicle charging stations, the 22mm CNX 722 Series TuffLED™ indicators are resistant to shock, vibration and moisture to ensure reliable and safe operation in harsh environment conditions.

The ruggedized 22mm CNX 722 Series TuffLED indicators feature fast pitch threads requiring only one turn to ease assembly, as well as a variety of connection options that facilitate fast, easy installation in extreme and outdoor applications. Special nuts enable assembly by finger or with 1" hextool.

The RoHS-compliant indicators have a built-in LED that can be used with 5, 12 or 24 volt D/C circuits. Custom LEDs and lens colors are available, along with an optional bezel that is also available in many colors.
